HIV/AIDS Disease Management Organizations (HADMO) globally need technologies that will lead to significant savings in:

- Care Collaboration
- Anti-retro Viral Treatment
- Medical Records
- Quality of Care Monitoring
- Measuring Care Efficiency
- Utilization management

HADMOs need technologies that will link prevention, treatment and care services, and build indigenous capacity and scale quickly to fight this pandemic effectively.

HADMOs need both products and services.

HADMOs require vendors whose services include training,

maintenance, support, disaster recovery, and product function upgrades.

HADMOs need applications that can adapt to provide the desired set of features localized to country's context.

HADMOs need vendors that can integrate with existing HIS, LIS, and/or Patient Management systems

HADMOs need vendors that can implement in phases:

- Installation
- Customization
- Workflow re-engineering
- Training

HADMOs need ...

Clinicio™—CHART. . .

Is an automated web based integrated Disease Management System (DMS) and Electronic Medical Record (EMR) application that integrates clinical, administrative and financial functions.

Reliably captures, reports, analyzes and provides access to lifetime patient information across multiple facilities of care—outpatient, inpatient, ambulatory clinics, nursing homes, and home-based care.

Provides computer-based frameworks that facilitates inter-facility and facility-patient collaboration.

Is customizable in functionality, personalized in access and workflow driven to ensure efficiencies.

Clinicio™—CHART. . .

Is a cost-effective technology to analyze clinical, administrative and financial outcomes of various care settings, services and clinical modalities across disease profiles and patient encounters.

Provides a secure, scalable and highly performant capability to integrate unstructured (text, paper, images) medical data across disparate systems and present a 360 degree view of patient information.

Is the technology glue that front-ends other high quality, cost-effective applications and services.

Clinicio™— CHART Features

Clinical Operations

- Schedule patient care events
- Manage individual provider tasks
- Coordinate clinical team activities, schedule, resources
- Manage patient populations
- Manage practitioner identity & credentials
- Manage patient identity, family grouping, demographics & care status

Clinical Assessment

- View patient record content
- Manage patient data / results
- Patient record cross-cuts
- Pill count adherence
- Track opportunistic infections

Clinical Documents

- Report patient status / care
- Prepare / transmit flow sheet, care summary
- Prepare standardized continuing care record
- Prepare / transmit referral consult reports

Clinical Process Improvement

- Manage quality measures and improvement activities

Data Exchange

- Laboratory and imaging order/result
- Medication prescriptions
- Clinical documentation
- Secondary uses of clinical data
- Administrative and financial data
- Document Management

Clinical Communication and Data Management

- Provider communicates with provider
- Provider communicates with patient
- Protect patient confidentiality
- Manage care adherence
- Track/measure drug utilization
- PEPFAR Monthly/Quarterly Reporting
- Cohort Analysis
- Online Analytics

Clinical Orders

- Order medications
- Order diagnostics (lab, imaging)
- Refer patient to provider
- Order nursing care
- Managing order rules and alerts
- Administer medications
- Administer other therapy
- Support patient re-treatment & clinical actions
- Manage patient diet

Clinical Decisions

- Plan patient care
- Follow best-practice guidelines
- Manage regimen substitution/switch
- Alerts and reminder management
- Drug-Drug Interaction*

Administrative & Financial

- Drug Inventory management*
- Insurance information capture
- Claims Coding & Billing generation
- Public health reporting
- Report to national / specialty disease registries
- Medical education
- Records Archival Management
- Content Management
- Organization/Facility/User/Security Management
- HIPAA Compliance
